ELEGANCE

GLAZED PORCELAIN

A Widespread Harmony

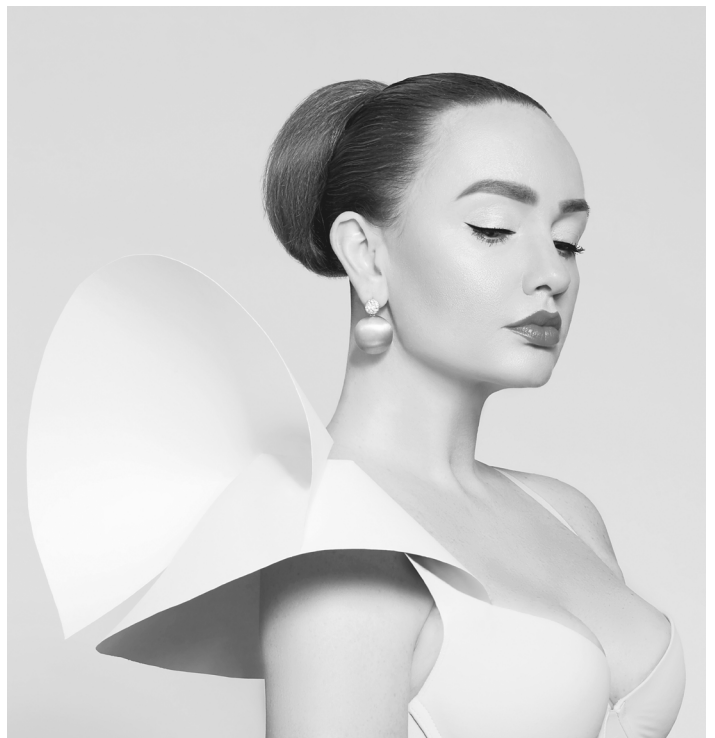

*“True elegance
becomes more so as it
approaches simplicity”*

– Henry Ward Beecher

i While new trends and ideas are always appearing and capturing the heart of people, there is something about simplicity and elegance that is quite irreplaceable, like a comfortable and familiar place that you can always come back to. Wild pops of color and fantastical graphics can be fun and beautiful, but can also often take away all the attention and become the sole focus – that is true both in the art world and in interior design. There will always be the need for something more neutral and complimentary to balance out the wildness with control, the harshness with the softness, the new with the traditional.

The Elegance collection wants to be a safe harbor for the research of that kind of beauty that never goes out of style, the style that is always needed to create the perfect space that isn't boring or uninspired, rather timeless and always on trend. The selected shades range from dark to light colors, but always in the neutral range, to perfectly complement any look for years to come.
